* = Interoperability with the handtree devices has been tested against either the OEM car kits (e.g. JCI) or directly on the cars (e.g. Toyota Prius). The tests have been performed on representative products and not against all the variations (year, make, model, software revision etc.). While the tests improve the probability that the Treo 700w will interoperate with various versions of the tested OEM handsfree devices and car models, it cannot be guaranteed that all versions (year, make, model, software revision etc.) of all the car kits will interoperate in an identical way.

** = Treo 700w is a Bluetooth Qualified product and has passed the Bluetooth SIG's test plan for v1.2 compatibility performed by an independent Bluetooth Qualification Board (BQB). This implies that Treo 700w may interoperate with other v1.1 and v1.2 Bluetooth Qualified car kits. However, compatibility for all the features on every car kit in the market cannot be guaranteed.

n/a = Functionality not supported by the Car Kit and/or Device over Bluetooth
c/i = Functionality internal to the Car Kit only. Handset functionality is not utilized.
